

Part 2

Clarifications

Clarification

- Euros only but possible to transport a limited percentage of other currencies
- Not for metal, bullion, diamonds, jewellery and securities
- Majority of stops in non-home country
- National rules still apply for security sensitive operations (pavement, notification, police support)
- Point-to-point must return within 24 hours and can be executed with armoured trucks only

Clarification

- Cross border or international CIT transport not covered by this EU regulation (eg, gold and securities) is governed by national CIT laws/countries of destination.
- This might require specific licensing and international road licenses whenever the cross border regulation does not apply

Conclusion

- Application
- How can we help you further?
