ESTA Conference

Vienna, 20 May 2019

Thierry Lebeaux
Secretary General

- UK consultation on Digitalisation of Payments/Access to cash
- Cash contingency
- Social dialogue meetings
- Cash payments limitations

UK consultation on digital payments Response to the call for evidence in the call for evidence

Response to the call for evidence on Cash and Digital Payments in the New Economy – June 2018

ESTA's responses focused on:

 Cash is public money, digitalisation is privatisation of money

HM Treasury Cash and Digital Payments in the New Economy Call for Evidence

The response of ESTA to the UK public consultation 5 June 2018

- Digital payments no need for public support!
- Social aspects of cash
 - Cards and overspending/overindebtedness
 - The least well-off are going to be impacted
- Macro aspects of cash
 - Financial stability
 - Cash saved the world literally!

UK consultation on digital payments - response

218 responses, 86 organisations: published on 3rd May

- Digital payments will grow, cash will decline
- Cash and digital payments in the Issues to be addressed with digital payr summary of responses
 - Competition
 - Transactions costs & Transparency of costs
 - Outage and security
- Strong focus on tax evasion and money laundering
- **Cash remains vital for many**
 - Government committed to safeguard access to cash
- Creation of a "Joint Authorities Cash Strategy Group"
 - BoE, Treasury, Payment system regulator and Financial conduct authority

Cash contingency paper

Keep payments safe efficient and competitive:

- Continuity of payments
- New payment landscape

Financial stability ("no cash, no banks")

ESTA
Contingency
paper
(Dec 2018)

The CMC industry can play its role, if:

- Flexibility in cash processing
- Balance sheet relief mechanisms
- Nation wide operators

Legal tender
What does it mean if anyone can refuse a payment in cash?

Condition for cash continuity

- Availability of cash services
- Change money

Cash in the EU social dialogue

- CoESS as a social partner with UNI Europa
- Cash issues introduced in the social dialogue agenda in 2017
 - Cross border regulation
 - War on cash
 - Cash phase out in Sweden and Access to Cash review in the UK
- Phase out of cash and impact on employment

CPL: the money laundering argument

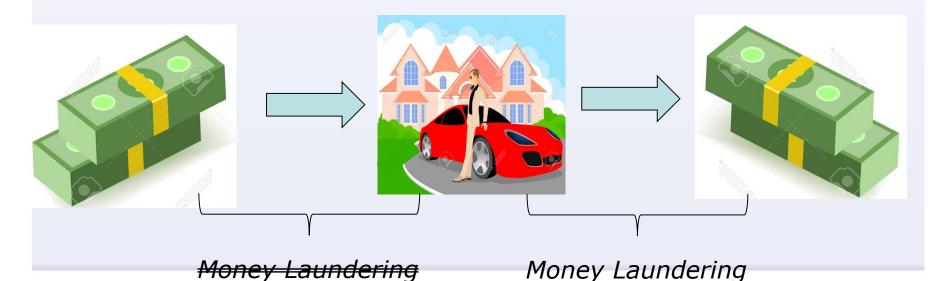

Commission report (June 2018):

"Cash is the starting point of money laundering, which requires some cash transactions, often through the acquisition of high value goods".

Use of Money

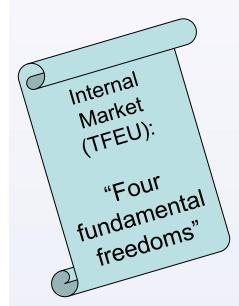

<u>Concealing</u> the source of monies

CPL: the Internal Market argument

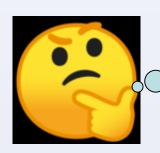

"CEPS report supports the assumption that cash restrictions have an impact on displacement of turnover"

CEPS: Free movement

"Cross Border Evasion"

Isn't "shopping around" the very nature of the Internal Market?

... and Article
63 TFEU
prohibits
restrictions on
payments!

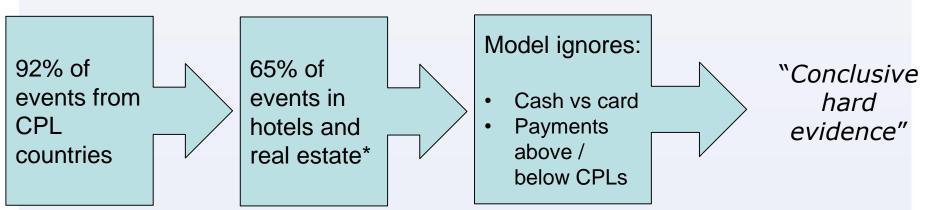

CPL: CEPS' "scientific approach"

Objective: "Show if CPLs generate cross border displacement" trough a regression model (Sample 1.2m events)

However, CEPS 'circular' hypothesis reads:

"in case of <u>existence</u> of CPL in a Member States, the hypothesis will be that <u>there will be displacement</u>" (!)

CEPS conducted no assessment of displacement between countries with CPL and countries without

^{*} i.e. immovable goods: cross border trade requires consumers' displacement!

CPL: Commission conclusion

There is therefore nothing to warrant the conclusion in the Commission report that:

- "A prohibition of high value payments in cash could have a positive impact on the fight against money laundering".
- "Diverging CPL distort competition in the internal market, leading to <u>potential</u> relocations of businesses across borders"

A cautious response from Commissioner Moscovici

Mr. Pierre MOSCOVICI Member of the European Commission Rue de la Loi 200 B-1049 Brussels Belgium

Brussels, 4th July 2018

Dear Commissioner.

Re: Cash payments restrictions: initial comments on the Commission 12.06.2018 based on the CEPS/ECORYS study

We are writing to you on behalf of the three main trade associations dealing with cash.

The Commission Report COM(2018)483-Final on restrictions on payments in cash ("the Report") was published on 12th June 2018. Having read the report and the CEPS/ECORY study ("the Study"), we feel compelled to make a number of important comments on three major issues.

1) Inadequate and partial use of inputs received during the public consultation process The study has only used a tiny part of the consultation inputs and only those which concur to

support the hypothesis of the authors. The vast majority of qualitative inputs submitted to the Commission during the 2017 public consultation has not been considered for the Study. It would be surprising if the Terms of Reference given to CEPS/ECORYS did not require them to consider this input.1

2) No evidence is gathered that cash restrictions might improve the effectiveness of antimoney laundering policies

The Study seems to never really grasp the complexity and peculiarity of money laundering and confuses money laundering, which is the process of disquising the origin of illicit funds (cash or non-cash) and the use of illicit money. The distinction between both is fundamental, as the use of unlaundered illicit money can be easily prosecuted, whilst in the case of laundered funds, the proof of laundering is needed before any legal action can be undertaken. Cash payment restrictions are totally ineffective in the case of laundered funds, which have the appearance of licit funds. The main questionable outcome of the Study is to believe that a minor offence related to cash payment restrictions might act as a deterrent vis à vis persons and organisations already perpetrating very serious offences severely reprimanded by the law.

ESTA . EURICPA and ATMIA Rond Point Schuman 6 - 85 B-1040 Brussels

PIERRE MOSCOVICI MEMBRE DE LA COMMISSION EUROPEENNE

Brussels. 1 8 SFP. 2018

It was drafted under the responsibility of its authors. ... + July regarding the Ecorys/CEPS study on restrictions on

The study and the report are the result of an initiative stemming from the 2016 Action Plan against terrorism financing1. The study has been commissioned with a special focus on terrorism financing. It was drafted under the responsibility of its authors. The Commission's report draws from the findings of the study, and the main conclusion is that the Commission is not considering any legislative initiative at this stage. If any future initiative were to be decided, it would, in the framework of "Better Regulation2", require the preparation of a full impact assessment.

At this stage however, this initiative3 is closed.

Yours faithfully,

Pierre Moscovici

Mr. Ron DELNEVO, Executive Director Europe ATMIA Mr. Patrice RULLIER. Chairman EURICPA

Mr. Thierry LEBEAUX, Secretary General ESTA

COM(2016) 50.

2 COM(2015) 215

Initiative described in the Inception Impact Assessment of 23 January 2017

http://ec.europa.eu/smart-regulation/roadmaps/docs/plan_2016_028_cash_restrictions_en.pdf

Commission européenne - Reri 10/169 R-1049 Bruxelles - Belgique - Tél. 00.32,295 54 81 - Email: pierre moscovici@ec.europa.eu

The only reference to it seems to be the comment page 87 that "position papers of stakeholders representing companies in cash reliant sectors pointed to the negative effect of cash restrictions

CPL: Legal Assessment

Review of Art 114 TFEU as a legal basis for CPLs

The very nature of the IM is the opportunity to « shop around » for the best deal accross borders (unite markets into a "single market")

CEPS study shows no difference in efficacy between *CPLs* and simple "declaration obligations".

Compatibility of CPLs with Art 63/65(1.b) TFEU

Sir David Edward QC

Disparities in rules not enough: there must be an appreciable risk of damage to the working of the IM.

CEPs study largely anecdotal

Limited evidential basis for EU legislation

Thank You
